

Module/Section	Page Number
Module 1 : A Brief History of Science	
Introduction	1
The First Inklings of Science	1
True Science Begins to Emerge	4
Experiment 1.1: Density in Nature	5
Experiment 1.2: Atomic Motion	7
Three Other Notable Greek Scientists	8
The Progress of Science Stalls For a While	12
Experiment 1.3: A Chemical Reaction	12
Science Begins To Pick Up Some Speed Again	16
The Renaissance: The “Golden Age” of Science	19
Experiment 1.4: Mapping the Paths of the Planets	21
The Era of Newton	23
The “Enlightenment” and the Industrial Revolution	25
The Rest of the Nineteenth Century	25
Modern Science (1900 AD - Present)	27
Summing it Up	29
Module 2 : Scientific Inquiry	
Introduction	33
What Science is NOT	33
Experiment 2.1: How Does Weight Affect the Speed	33
Experiment 2.2: Learning More About Weight and Speed	34
The Scientific Method	38
Experiment 2.3: The Broken Flashlight	41
Failures of the Scientific Method	43
The Limitations of Science	47
Science and Christianity	48
Module 3: How to Analyze and Interpret Experiments	
Introduction	57
Experiments and Variables	57
Experiment 3.1: A Floating Egg?	58
Using a Series of Experiments	61
Experiment 3.2: Which “Boat” Will Move?	61
Experiment 3.3: What Does Soap Do To Water? - Part 1	63
Experiment 3.4: What Does Soap Do To Water? - Part 2	64
Recognizing Experimental Variables When They are not Obvious	68
Interpreting the Results of Experiments	71
Module 4: Science, Applied Science, and Technology	
Introduction	79
The Distinction Between Science, Applied Science, and Technology	79
Simple Machines	82
The Lever	83
Experiment 4,1: The Lever	83
The Wheel and Axle	89
The Pulley	91
Experiment 4,2: A Simulation of A Series of Pulleys	92
The Inclined Plane	95
The Wedge	96
The Screw	98
Module 5: The History of Life: Archaeology, Geology, and Paleontology	
Introduction	107

How Do We Learn About The History of Life?	107
Archaeology and History	108
The Internal Test	112
The External Test	115
The Bibliographic Test	119
Archaeology in the Absence of Historical Documents	120
Relative Dating and the Principle of Superposition	125
What Do We Know About Human History?	126
Module #6: Foundations of Geology	
Introduction	133
Soil, Rocks and Minerals	134
Experiment 6.1: The Difference Between Rocks and Minerals	136
Strata in Sedimentary Rock	138
Experiment 6.2: Separation of Sedimentation	139
Weathering of Rocks	141
Experiment 6.3: Physical Weathering	142
Experiment 6.4: Chemical Weathering	143
Erosion	145
Experiment 6.5: Erosion	145
Bringing It All Together: The Basic Structure of the Grand Canyon	150
Module #7: The Fossil Record	
Introduction	157
The Making of Fossils Part 1: Casts and Molds	157
Experiment 7.1: Making a Fossil Cast	158
The Making of Fossils Part 2: Petrification	160
The Making of Fossils Part 3: Carbonate Residues and Impressions	161
The Making of Fossils Part 4: Avoiding Decomposition	163
Experiment 7.2: Sinking in Ice	164
Three General Features of the Fossil Record	166
A Fourth General Feature of the Fossil Record	169
Geology and Paleontology from the Uniformitarian Viewpoint	172
Geology and Paleontology from the Catastrophist Viewpoint	175
Which View is Correct?	178
Module #8: Uniformitarianism and Catastrophism	
Introduction	185
Uniformitarianism and the Geological Record	185
Experiment 8.1: A Simulation of Using Index Fossils	186
Uniformitarianism and Evolution	191
Catastrophism and the Geological Record	193
Catastrophism and the Fossil Record	198
Uniformitarianism or Catastrophism: Which is Better?	202
Evolution: Another Weakness of Uniformitarianism	205
Module #9: What is Life?	
Introduction	213
DNA and Life	213
The Structure of DNA	216
Experiment 9.1: Building a Model of DNA	217
Energy and Life	221
Experiment 9.2: Finding Food in Plants	221
Experiment 9.3: A Simple Biosphere	223
Sensing and Responding to Change	225
Experiment 9.4: Sensing and Responding to Change	226

Reproduction and Life	228
Experiment 9.5: Fruit Fly Reproduction	228
The Cell - Life's Smallest Unit	232
Module #10: Classifying Life	
Experiment 10.1: Factors that Affect Bacterial Growth (Part 1)	239
Introduction	240
The Five-Kingdom System	241
Kingdom Monera	243
Experiment 10.1: Factors that Affect Bacterial Growth (Part 2)	245
Kingdom Protista	248
Kingdom Fungi	251
Experiment 10.2: Yeast is a Decomposer	254
Kingdom Plantae	255
Experiment 10.3: Vegetative Reproduction	255
Experiment 10.4: Turgor Pressure	257
Kingdom Animalia	258
Module #11: The Human Body: Fearfully and Wonderfully Made	
Introduction	263
The Superstructure of the Human Body	263
Bones and the Human Skeleton	265
Experiment 11.1: Minerals in Bone	265
Skeletons in Other Organisms	269
Skeletal Muscles	271
Smooth Muscle and the Cardiac Muscle	277
Muscles and Movement in Other Organisms	279
Experiment 11.2: Phototropism and Gravitropism in Plants	280
Skin	280
Experiment 11.3: Skin Color	284
Skin in Other Organisms	285
Summary	286
Module #12: Energy and Life	
Introduction	291
Life's Energy Cycle	291
How Do Organisms Get Energy From Food?	294
Experiment 12.1: What Combustion Needs	294
Experiment 12.2: What Combustion Makes	296
What Actually Gets Burned For Energy?	299
Energy Use in the Body	304
Experiment 12.3: Body Temperature	305
Metabolic Rates Throughout Creation	308
How Combustion Works in Living Organisms	310
Module #13: The Human Digestive System	
Introduction	317
The Process of Digestion	317
Experiment 13.1: Seeing a Part of the Digestive Process	317
The Human Digestive System	319
The Mouth, Pharynx, and Esophagus	322
The Stomach and Intestines	325
Experiment 13.2: Stomach Acid and Antacids	326
The Liver, Pancreas, and Gall Bladder	331
Experiment 13.3: The Effect of Sodium Bicarbonate on Stomach Acid	333
The Micronutrients	334

Module #14: The Human Respiratory and Circulatory Systems

Introduction	341
The Human Circulatory System	341
The Heart and Blood Flow	344
Experiment 14.1: Your Own Cardiac Cycle	348
The Components of Blood	350
Lungs and Blood Oxygenation	352
Experiment 14.2: Measuring the Capacity of Your Lungs	354
The Respiratory System	356
Experiment 14.3: A Model of Your Lungs	357
Experiment 14.4: A Model of Your Vocal Cords	358
Circulation and Respiration Throughout Creation	359
Experiment 14.5: Xylem	360

Module #15: The Human Lymphatic, Endocrine, and Urinary Systems

Introduction	365
The Lymphatic System	365
Experiment 15.1: Working Your Lacrimal Glands Too Hard	368
Lymph Nodes	370
The Urinary System	373
Experiment 15.2: A Model of Kidney Function	375
The Endocrine System	377

Module #16: The Human Nervous System

Introduction	383
Neurons: The Basic Unit of the Nervous System	385
The Basic Layout of the Human Nervous System	389
Our "Split" Brains	393
Experiment 16.1: Determining a Person's Dominant Side	393
The Brain and Blood	396
The Peripheral Nervous System (PNS)	398
Experiment 16.2: The Pupil of the Eye	399
The Human Sense of Taste	401
Experiment 16.3: Mapping Your Taste Buds	402
The Human Sense of Smell	404
Experiment 16.4: The Sense of Smell and the Sense of Taste	404
The Human Sense of Vision	406
Experiment 16.5: The Human Blind Spot	408
The Human Sense of Touch	411
Experiment 16.6: The Variation in Touch Sensitivity	412
The Human Sense of Hearing	413
Do We Really Use Only 10% of our Brain?	414
Summing it All Up	415
